Lovely Professional University, Jalandhar

08/2017 - Present   CGPA: 8.11/10

12th Non-Medical
Rishikul Vidyapeeth, Sonipat(Haryana)

05/2014 - 05/2016   Percentage: 80.4%

PROJECTS

Employee Record Management System (02/2020 - 03/2020)
- This project was designed using MEAN stack technology. The sole purpose of ERMS was to reduce the paperwork involved in the day-to-day records of the employee. Front-end part had different interfaces for users and admin associated with that record. We aimed to improve the way of recording the data of employees by storing his/her education and experience information and successfully achieved it. The technologies used in this project were HTML, CSS, JavaScript, Bootstrap, PHP, and MySQL.

LifeStyle Store (06/2019 - 07/2019)
- Developed on the concept of front-end and backend functionalities of web development. It is an online platform which consists of some web pages like Home Page, Login Page, Sign Up Page and any other web pages through which the user can interact with them and can buy the products according to their choices. The technologies used in this project were HTML, CSS, JavaScript, PHP, Bootstrap and MySQL.

Blood Donation (04/2018 - 02/2018)
- The project was to develop a website related to Blood Donation and the website which contain all details of available blood donation camps in the areas. In this website, there is a login page where user will have to enter his/her unique ID and Password. The technologies used were HTML, CSS and JavaScript.

Event Management System (12/2017 - 01/2018)
- This project was programmed using C++ language and was used to manage the events occurring in our college. Different modules were included such as editing, deleting, adding and then retrieving the details of desired events based on requirement. Admin can add or delete any event, can see the details of student who have registered for any or all event and can reply to user's query. Users can register in any event and can ask any query.
